PERSONAL PROFILE

I am a Software Engineer with a robust background in building scalable web applications . I am proficient in programming languages such as Java, Python, TypeScript and Javascript. I also have knowledge of C programming language. I have hands-on experience in web development, API development, Microservices and Systems Design, databases and version control systems. I am also familiar with blockchain development. I am always eager to learn and also seek experience in software development.

SKILLS

TypeScript, NextJS, Git/Github, ReactJS (NextJS), NodeJS, PostGresQL, RESTAPI, Django, Django-Rest-Framework, FastAPI, Microservices, Java, SpringBoot, Kafka, Redis.

EDUCATION

Kings College Lagos (Secondary Education)	Sep 2013 – July 2019
Federal University of Technology Minna	Sept 2021 – Till Date

EXPERIENCE

Strixt Limited	July 2025 - Till Date
Role: Founding Java Backend Developer	
Remita Payment Services	July 2025- December 2025
Role: Java Backend Developer Intern	

TECHNICAL PROJECTS

Rate-Limiter: A rate limiter that sits in front of downstream service to rate limit requests and return a 429 error if requests passes the limit set. Built with Java, Spring-Boot and Redis.

Movie-Rating-Microservice is a backend-focused microservices project designed to manage movie ratings, likely exposing APIs for creating, retrieving, and aggregating user ratings for films. It demonstrates core microservice concepts such as service separation, API communication, and data handling in a scalable way, similar to typical movie rating systems that allow users to rate and review movies while maintaining modular backend components. Built with Spring-Boot, Spring Cloud Gateway, Discovery and Postgres.

Ai-To-DB: An open-source platform where users can query their sql databases with natural language by just inputting the connection string of the database. Built with FastAPI and NextJs
