PERSONAL PROFILE

I am a Software Engineer with a robust background in building scalable web applications. I am proficient in programming languages such as Java, Python, TypeScript and Javascript. I also have knowledge of C programming language. I have hands-on experience in web development, API development, Microservices and Systems Design, databases and version control systems. I am also familiar with blockchain development. I am always eager to learn and also seek experience in software development.

SKILLS

TypeScript, NextJS, Git/Github, ReactJS (NextJS), NodeJS, PostGresQL, RESTAPI, Django, Django-Rest-Framework, FastAPI, Microservices, Java, SpringBoot, Kafka, Redis.

EDUCATION

Kings College Lagos (Secondary Education) 2019	Sep 2013 – July
--	-----------------

Federal University of Technology Minna	Sept 2021 – Till Date
---	-----------------------

EXPERIENCE

Strixt Limited Role: Founding Java Backend Developer	July 2025 - Till Date
---	-----------------------

Remita Payment Services Role: Java Backend Developer Intern	July 2025- December 2025
--	--------------------------

TECHNICAL PROJECTS

Rate-Limiter: A rate limiter that sit in front of downstream service too rate limit requests and return a 429 error if requests passes the limit set. Built with Java, Spring-Boot and Redis.

Movie-Rating-Microservice is a backend-focused microservices project designed to manage movie ratings, likely exposing APIs for creating, retrieving, and aggregating user ratings for films. It demonstrates core microservice concepts

such as service separation, API communication, and data handling in a scalable way, similar to typical movie rating systems that allow users to rate and review movies while maintaining modular backend components.
